MOHD SHAHID MOIN UDDIN

ASPIRING FULL-STACK DEVELOPER

Hyderabad, Telangana, India | shahidmohd7033@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Final-year Bachelor of Computer Applications (BCA) student and aspiring full-stack developer with strong HTML and CSS foundations and the ability to write basic JavaScript programs independently. Has project experience with Flask, Docker, GitHub Actions, AWS deployment workflows, and automated code-quality checks. Building independent Python and backend development skills, with interests in frontend development, Cloud, and DevOps. Uses AI development assistants to support coding and debugging while focusing on understanding architecture, workflows, and code changes.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, Flexbox, Grid, basic JavaScript; learning React and TypeScript.

Programming & Backend: Python fundamentals; Flask project exposure; backend concepts; REST API fundamentals.

Cloud & DevOps: Docker, Docker Compose, GitHub Actions, AWS EC2, ECR, IAM, SSM; CI/CD concepts.

Security & Data: SonarQube static analysis and quality-gate integration; MySQL basics; PostgreSQL schema exposure; JSON file storage.

Tools: Git, GitHub, Linux basic shell commands; ChatGPT, Gemini, Claude, Antigravity.

PROJECTS

Cloud-Based DevSecOps Platform | Python, Flask, Docker, GitHub Actions, AWS

Individual project

- Worked on a Flask dashboard for application health monitoring and deployment activity.
- Containerized the application using Docker and Docker Compose for consistent development environments.
- Configured GitHub Actions workflows for automated testing and SonarQube static code analysis.
- Set up a project-level AWS deployment demonstration using ECR to store container images and SSM to trigger updates on an EC2 instance.

GitHub repository

Hotel Management System | Python, Tkinter, JSON

Collaborative project with Abaid Khan

- Co-developed a desktop application with room booking, guest check-in/check-out, room availability, and guest search workflows.
- Contributed to the Tkinter interface, JSON-based persistence, staff and housekeeping modules, booking history, and revenue reporting.

GitHub repository

National Land Acquisition and Management System | Node.js, Express, PostgreSQL, GIS

Collaborative project with Abaid Khan

- Collaborated on frontend GIS map displays for land-parcel boundaries and geographic survey information.
- Assisted with testing Node.js/Express API routes and supported PostgreSQL schema organization for compensation records.
